

GPS Surround Academy

The ultimate golf lesson is now possible by utilising the GPS Surround Academy, linked in with the superb GPS Golf Simulator and any two teaching programs such as digital video, body motion, and weight transference software packages. To use alongside the own course practise, the custom fitting, the short game academy features, within the simulator program etc. The GPS Surround feature is being used by many leading PGA professionals, to significantly revolutionise the teaching experience for golfers. By enabling the professional to bring all the industry teaching tools to the forefront, in one complete surround visualisation lesson. So that the golfer can be for the first time be fully aware of their actual shot performance, on their own golf course.

The ultimate golf lesson is now possible by utilising the GPS Surround Academy, linked in with the superb GPS Golf Simulator and any two teaching programs such

Switch : Between Three Individual Screens To Three Combined Screens.

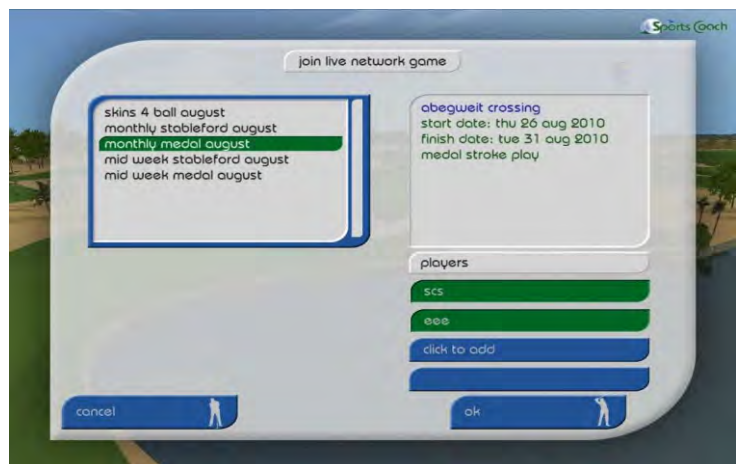

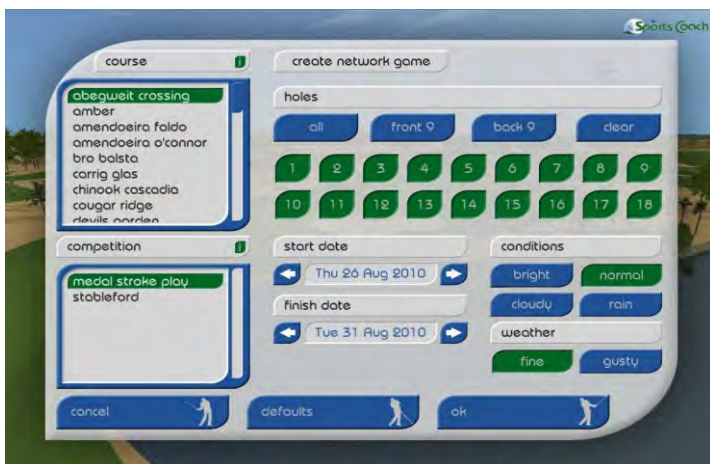

Surround Flexibility

The GPS Surround Simulator is the only simulator, which will allow the facility to easily switch between a full surround golf academy, too a 3 screen surround golf simulator. Enabling the surround simulator to be extremely flexible, generating the maximum usage and income for facilities, 12 months of the year. The GPS Surround Simulator is without any doubt the best visual experience of any golf simulator, with seamless blending of the three projected images. Specially adapted user friendly screens, ensure that the simple navigation is fully maintained. Enabling the program to also integrate with one projected image and two liquid crystal displays.

GPS Online

It is now possible to create and play multiple network games. So the client can easily choose the start date, the finish date, course to be played and the competition mode to be used. Enabling golfers to join several network games, with a list of the various games shown. The GPS Simulator is now Windows 7 and 64 Bit compatible.

GPS Course Library

There are now 100 released courses on the GPS Golf Simulator easily the largest and best golf course library in the world. There are another 54 famous courses under construction, due to the extremely realistic simulations that the Golf Simulator develop. Such as world renowned courses Banff Springs, Cape Kidnappers, Chateau Whistler, European, Kauri Cliffs and San Roque. Ensuring that all simulator customers can continually obtain, the very best courses on their GPS Golf Simulator. Many leading advertising agencies are currently booking the Golf Simulator and Celtic Manor 2010, so that their clients get the maximum marketing exposure during the Ryder Cup.

GPS Putting Simulator

The development team is currently integrating a low cost camera application, to work with the GPS putting simulation software. Enabling the installed putting simulator cost to be significantly reduced, due to having no need for a putting platform, putting sensor and overhead light. As well as a quicker installation time, for both rental and permanent applications, due to only needing 1m wide x 2.5m long. The perfect entertainment tool for non-golfing locations, such as health clubs, hotels, car dealerships and leisure centres.

The GPS Putting Simulator offers the very best introduction to the game of golf, for non golfers. As everyone can putt a golf ball, but not everybody has the ability to swing a golf club. Once installed at an indoor golfing facility, it will soon give the non golfer the confidence to test out a golf simulator. So generating the next beginner, who will need purchase golf lessons, golf clubs, clothing, lessons and simulator game play, so significantly generating enhancing the income of the golf facility.
