Latest Developments

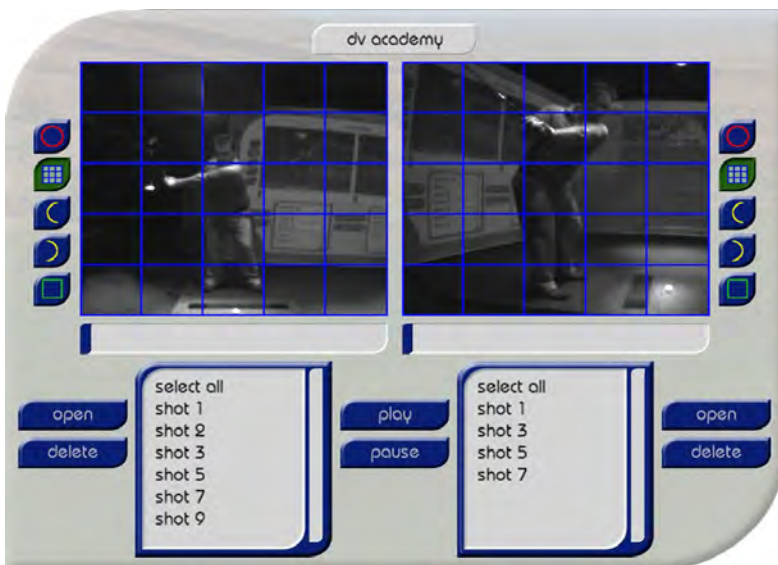

The Ultimate Golf Academy

Designed especially for Golf Clubs, enabling Members and Professional Staff to use the only, complete indoor coaching system. Golfers can for the first time instantly analyse their own Ball Flight, Shot Performance and Swing Performance. This comprehensive system uses 3d high speed cameras ensuring the world's most accurate ball flight. Uniquely the Golf Club's own course is the centrepiece, of this superb user friendly system. The „Ultimate Golf Academy“ generates considerable returns on investment, as well as giving all golfers a fantastic understanding of their game. Revenue Streams include complete on-course tuition, 2 camera video coaching, driving range, short game academy, putting practise, custom fitting, tournaments, longest drive, nearest to the pin, putting contests, as well as playing most of the world's famous courses.

Swing Performance

Is a unique feature allowing for automatic capture of the golf swing, when the ball is struck. The swing is replayed alongside ball flight and shot performance data automatically, without the need to touch any buttons. PGA professionals can offer a high quality lesson, the high speed cameras capture the club face position at any point during the swing, and simple graphical tools such as grids, line, circles can be superimposed onto the golf swings. 'Face On' and 'Down the line' viewpoints can be connected simultaneously. All golf swing video and flight data can be saved into the unique player database for current and future comparison purposes.

Player Performance

A comprehensive database is created to automatically save practise data for the golfer's entire game. The player performance database includes information from, range data, chipping data, putting data, custom fitting, tournament results, video coaching, game statistics, score-cards, as well as their full contact details. Up to five historic sessions can be loaded into the practise sections simultaneously, for detailed analysis of flight and data. The player database feature allows PGA Professionals to give high quality lessons, based on measured data from all aspects of the game. It encourages members to practise on the system regularly in between lessons, improving the revenue from the academy. The ease of use combined with the unique practice experience has never been seen before in academy golf and is a fantastic feature of the „Ultimate Golf Academy“.

Ultimate Golf Academy on LCD Monitor

For those not having a room big enough for the surround simulator but having space for a GPS front screen simulator, the solution with a LCD monitor showing the video and lostshot information simultaneous on a big screen. For all owners of a „OLD“ simulator, it's the right time to upgrade to the most accurate golfsimulator in the world - having the „Ultimate Golf Academy“ built in.

HSBC Golf Zone

HSBC will mark its first year as Patron of the Open Championship with the launch of the „HSBC Open Championship Golf Zone“ in the Tented Village at Royal St. Georges Golf Club, 10th to 17th July 2011. The interactive experience covers an area the equivalent of five tennis courts and officials are expecting approximately 50,000 spectators throughout the week.

Visitors can enter a Longest Drive and Nearest to the Pin competitions on an Open Championship course on the Three-Screen Golf Simulator; there will be seven Open golf courses, especially recreated for the R & A.

There will also be a full scale replica of St. Andrews' notorious Road Hole bunker, that visitors can try their luck escaping.

For full details of the HSBC Open Championship Golf Zone, go to www.hsbcgolf.com

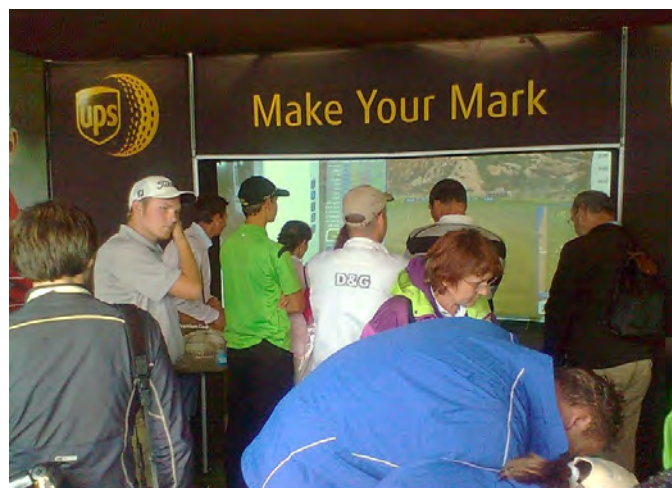

This Tented Village, or just a part of it can be rented for bigger events troughout EMEA. (Brochure available soon)

BMW International Open

The UPS Eco Simulator continues its road show, during June it was present at Germany's major golf event, the BMW International Open. The tournament is held annually at München Eichenried, situated close to Munich, in Bavaria. The course simulation of Eichenried was used during the event, which pleased German golfers, who were impressed by the realistic graphics. The simulator proved very popular, enabling the UPS stand to be the most popular exhibition stand, throughout the four days of the tournament. Golfers really enjoyed having their golf swing fully analysed, by PGA Professionals on the „Ultimate Golf Academy“.

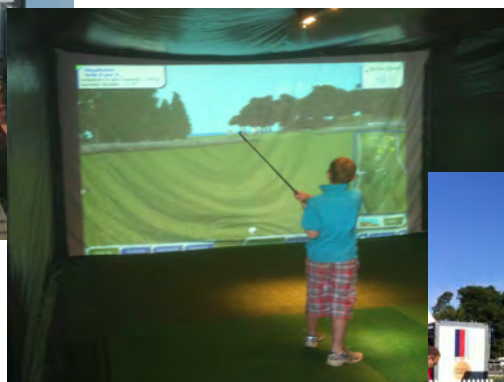

The next stop for the UPS Eco Simulator will be the Open Championship, at Royal St. Georges.

Festival of Speed

The GPS Gold Simulator was used throughout the world famous Festival of Speed, a motor sports event held annually at Goodwood. The simulator was hired in to generate more interest in corporate golf days, golf membership, society days and green fees. Overall the simulator was a runaway success, so much so that the owners, are now planning to install it permanently on the estate, as well as have their Kennels golf course being simulated. So the Kennels course can be the centre piece, of all future marketing of the golf facilities. The renowned estate is famous for Glorious Goodwood the horse racing festival, the Kennels a James Braid golf course, Goodwood House which is one of England's finest stately homes, as well as Goodwood Revival another motor sports event.
